

# Surface Loc<sup>®</sup>

**THE CLEAR SOLUTION TO YOUR DUST CONTROL  
AND EROSION CONTROL NEEDS.**

## WHAT IS SURFACE-LOC

**Surface-Loc** is a high purity grade co-polymer. **Surface-Loc** is very versatile, and can be used in many applications including dust control, erosion control and soil stabilization. **Surface-Loc** is applied very easily, is very affordable and reliable. When mixed with water and applied to the surface, it will penetrate down into the soil to create a tough layer of protection. **Surface-Loc** binds fine dust and aggregate particles to keep surfaces stable, dust free and dries clear. The level of **Surface-Loc** protection is determined by the amount used for different applications. Light applications of **Surface-Loc** are effective for binding soil particles together for dust and erosion control while allowing water and air to still penetrate the surface. Heavier applications build a durable and water proof surfaces. This hard surface is flexible and can even withstand the demands of vehicle traffic. This makes **Surface-Loc** a cost-effective alternative treatment for many applications.

## USES AND APPLICATIONS

**Surface-Loc** is a co-polymer binder. Co-polymer binding agents are very versatile and are used in many applications including erosion control, soil stabilization in trails, paths and even airport runways. **Surface-Loc** can be applied very easily with any applicator truck and can be easily applied with a hand sprayer, if need be. **Surface-Loc** is very affordable and reliable. It is shipped in a concentrated form. Ask one of our sales professionals for the proper application rate to meet your specific requirements.
