

# BioSock™

# Compost Filter Socks

**BioSock™** Compost Filter Socks are robust BMP devices that are extremely capable in multiple applications. The Patent Pending **SynergyNet™** Construction enables customization of the sock to achieve specific levels of strength, compost containment, filtration, rigidity, and bio-degradation.

Our products have the ability to provide superior performance, while at the same time lowering installation cost and reducing maintenance requirements.

**BioSock™** has a wide range of uses: Silt Fence replacement, Perimeter Protection, Area Drain & Grate Inlet, Stockpile Containment, Check Structure, Slope Interruption Device (SID), Curb Inlet Protection.
